

BİLGECAN TARIM

Natural | Healthy | Delicious

The motherland of the fig, one of the oldest fruits whose history is almost equally known to human history, is Anatolia. For centuries, one of the most significant items of export from the Aegean region has been the super famous delicious dried fig.

Aydın is the first city that comes to mind about figs in Turkey, world's biggest dried fig producer. Bilgecan LLC functioning in the dry fruit sector since 2011 combines the fertile lands of Aydın and sunshine where figs are grown in quality that are accepted and demanded not only in domestic market but also in the world, and processes the figs grown by natural and healthy agricultural techniques in its own gardens.

Bilgecan LLC, always aiming to provide the best service with a perfectionist approach to hygiene and product quality, makes production in accordance with world standards. The dried figs and chestnuts are processed with great care with modern machines and expert staff in accordance with IFS & BRC quality production and health standards.

Bilgecan LLC, acting with innovative methods and applying its customer satisfaction-oriented production and service understanding in all processes, has a total area of 3,800 square meters. 1,800 square meter area is used as a fig packing area under hygienic and natural conditions, and 1,000 square meter area is used as chestnut processing and packing area. Besides the facility has 300 square meters of cold storage.

Having the flexibility to offer any desired amount of products in the most suitable package sizes, Bilgecan LLC continues the tradition of centuries by delivering natural and delicious dried figs to the whole world with its high capacity to meet international demands.
